HOLISTIC TREATMENTS

Thai Yoga massage

Our trained therapist will make you feel like you have been transported to Thailand.

This is an ancient healing art of traditional Thai medicine with a complex sequence, soft tissue pressing, stretching, twisting and joint manipulation.

It draws from acupressure, yoga therapy and reflexology.

Thai massage is performed on a futon over clothing on the floor.

Hot stone massage

Heated stone therapy is a technique where warm stones are strategically placed and massaged on your body.

Working on the meridian lines of your body, as well as specific points along your spine, in the palms of your hand or even between your toes, has the power to improve the flow of energy in your body.

The stones "iron" away tension and stress leaving you balanced and deeply relaxed.

It's a form of massage in which pressure is applied to certain parts of the feet in order to improve circulation, ease pain and promote relaxation.

This can help restore balance throughout the body.
